SUMMARY

Motivated engineering graduate skilled in .Net,SQL and frameworks like React JS. Passionate about software development, Demonstrates a strong foundation and accessibility best practices, with a collaborative mindset and enthusiasm for delivering high-quality digital experiences. Eager to contribute to technology-driven projects while continuously expanding expertise in advanced computing, visualization, and real-world system integration.

INTERNSHIP EXPERIENCE

Web Development and React.js Intern

- Shristi Innovative, Techno Park ,Trivandrum | 1 Month | July 2023
- Gained hands-on experience in creating responsive and structured web pages using HTML, CSS, and basic JavaScript. Learned web development fundamentals and real-world project practices. Worked on component-based development, state management, and building dynamic user interfaces using React.js.

Full Stack Development

- Faith Infotech, Techno Park ,Trivandrum | August , 2025 – April 2026
- Worked on a full-stack application using .NET, SQL, and Angular, focusing on developing scalable backend services and dynamic frontend interfaces. Involved in implementing RESTful APIs, database design, and role-based authentication. Contributing to modules such as user management, data handling, and report generation while ensuring efficient performance, clean architecture, and secure data transactions across the application.

TECHNICAL SKILLS

Languages: C#,python,SQL,JavaScript/TypeScript
FrameWork: ASP.NET Core MVC,ADO.NET
Front-End: Angular Basics,React,Bootstrap,HTML,CSS
DataBase: SQL Server,MySQL
Tools: Visual Studio,VS Code,Git,SSMS,PostMan
Core Concept: OOPs,Model Binding,REST APIs
SoftSkill: Problem-Solving,Collaboration,Time Management

EDUCATION

ST Xavier's Catholic College Of Engineering **Jun 2021 - May 2025**

Anna University

- Major in Computer Science and Engineering.
- Final Year Project done in Carpooling application using React Native and firebase

RPR.HINDU VIDYALAYA HRS.SEC.SCHOOL,THUCKALAY **Jun 2019 - APRIL 2021**

SSC-75% HSC-76%

PROJECT

RECENT PROJECT: Hospital Management System
Technologies: C#, ASP.NET Core Web API, Angular, SQL Server, Entity Framework Core, ADO.NET, JWT

- Developed a full-stack Hospital Management System using Angular, ASP.NET Core, and SQL Server.
- Implemented JWT authentication and Role-Based Access Control (RBAC) for secure user access.
- Built modules for patient registration, appointment scheduling, doctor consultation, billing, and staff management.
- Developed RESTful APIs and integrated them with Angular for seamless frontend-backend communication.
- Utilized SQL Server, Entity Framework Core, ADO.NET, and stored procedures for efficient data management.
- Applied layered architecture (Controller, Service, Repository) with responsive UI, validation, and CRUD operations.

GitHub: https://github.com/Abinanth258/HospitalManagement

FINAL YEAR PROJECT: RideCircle – Carpooling Application
Technologies: React Native, Firebase, Firestore, Google Maps API, JavaScript

- Developed a cross-platform carpooling application using React Native and Firebase.
- Implemented Firebase Authentication, ride creation, booking, and real-time ride management.
- Integrated Google Maps and live location tracking for navigation and ride updates.
- Built in-app chat, fare calculation, and ride history features to improve user experience.
- Used Firebase Firestore/Realtime Database for secure real-time data synchronization.
- Designed a responsive mobile interface with scalable and modular components.
